

Harry's Bug Pairs

This is a fun game which helps develop memory skills.

What you'll need:

- *Printer*
- *Scissors*
- *Paper/card*

What you do:

Carefully cut out the images below. Start with fewer cards for younger children and increase the number of pairs for older children. This game can also be played by more than one person if you have 8 or more pairs.

Mix the cards up and place face down on a table.

Ask your child to pick up two cards at a time and see if they match.

If they match they stay face up, if not they turn them over and try again.

If you are playing the game with more than one person take turns to turn over 2 cards. The winner of the game is the person who reveals the most correct pairs.

Keep going until all of the pairs are revealed.
